

Broad category

Carbohydrate-binding modules (CBMs) — glycan grips

Catalytic partner domains (non-GH18)

Cellulosome / cellulolytic apparatus add-ons

DNA/RNA-binding & regulators occasionally fused

Ig-like & related β -sandwich scaffolds (adhesion, spacing)

Lectins (β -trefoil / jacalin / C-type / others)

Outer-layer/periplasmic envelope helpers

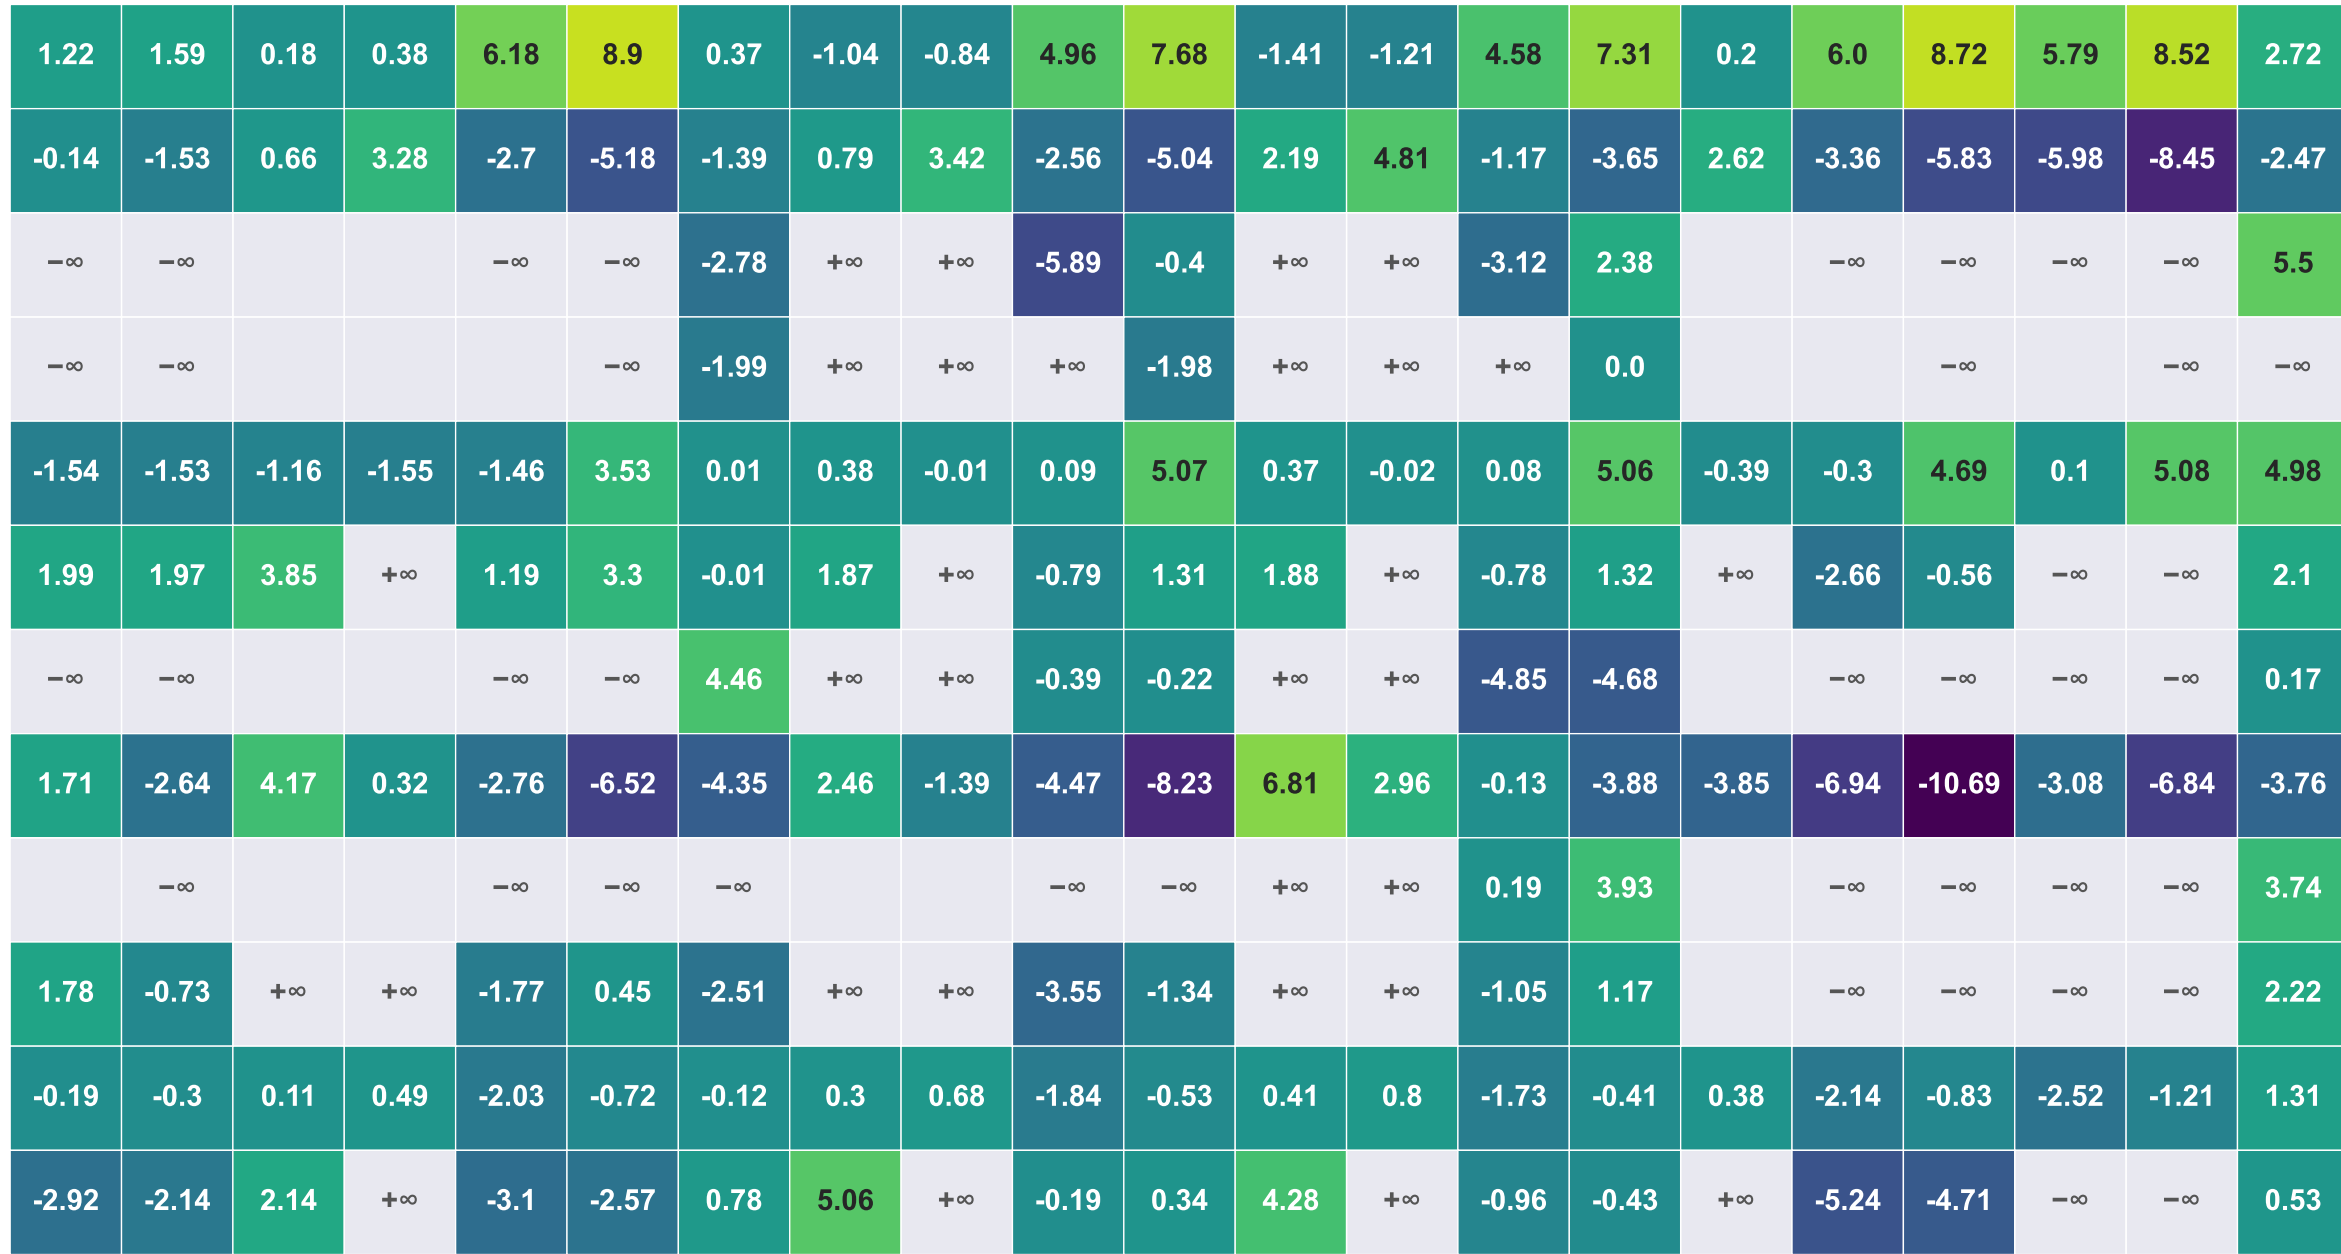

Peptidoglycan-/cell-wall binding and SH3b group

Redox/stress/metal helpers

Repeat/stalk & coiled-coil/IDRs (mechanical spacing)

Surface anchoring & secretion/sorting systems

Unknowns / DUFs / broad structure-only calls

log2(odds ratio)
